DECKING

CARE AND MAINTENANCE

In order to keep a hardwood timber deck looking its best, it must be kept clean and well maintained. It is a good idea to inspect a hardwood timber deck at least annually to ensure that it is in good condition.

The deck must be regularly maintained as it may become discoloured or affected by moisture and weather. Inspect the deck to replace loose boards and protruding nails or screws. Any loose or damaged boards should be resecured or replaced, loose nails hammered back in or screws refixed.

To clean the deck, sweep off any loose dirt or garden residue and then clean the deck with a specialised deck cleaning product. It is important to not only remove dirt, but any algae or moss that may be growing on the deck. After the cleaning has been completed, lightly sand the deck in the direction of the timber. This will remove any splinters and damage to the timber.

Once cleaned, reseal the deck with a stain, oil, paint or varnish, depending on aesthetic preference. Before the decking finish is applied, cover areas around the deck that need protection such as plants and furniture. Drying times are dependent on the type of finish so check finish manufacturer's recommendations before walking on a newly finished deck. Apply and re-apply decking finish as per finish manufacturer's recommendations. Finish manufacturers may recommend that the decking finish needs to be re-applied more than once a year.

After a new timber deck has been built, or an existing deck repaired, thoroughly sweep and clean to remove metal filings from drilling, nailing or other construction materials that may cause black spots on the hardwood deck when exposed to the elements.

If the deck has turned grey from natural weathering or is discoloured due to metal filings or other construction materials, there are a large range of maintenance and cleaning products on the market which can bring back the timber's original colour. Use with care and follow the finish manufacturer's instructions carefully.

For full installation, care and maintenance or warranty information, please contact Boral Timber on 1800 818 317 or visit www.boral.com.au/timber

Promoting sustainable forest management

Note: Variations within a timber species are normal, therefore photographs, samples and displays can only be indicative of colour and should not be used for final selection. It is normal for natural timber products to react to changes in atmospheric and environmental conditions such as humidity and temperature.
